## 2. Purpose of and reasons for the issuance of Class Shares through the Third-Party Allotment

### (1) Primary purpose of funding

Guided by its corporate philosophy, "We contribute to people's health. We are dedicated to people's genuine smiles," the Company is engaged not only in its core generic drug business but also in a wide range of health-related initiatives. These include efforts to support the maintenance of health and to restore pre-symptomatic conditions to a healthy state or prevent their progression. Through these initiatives, the Company aims to contribute to the extension of healthy life expectancy and to remain a company that is needed by society and local communities in every era.

In its report titled "Study Group on the Ideal Industrial Structure for Ensuring the Stable Supply of Generic Drugs," the Japanese government has called on the generic pharmaceutical industry to recognize its social responsibility as an industry that underpins national healthcare by ensuring the stable supply of high-quality drugs. The report further urges the industry to proactively undertake structural reforms so that companies and the industry as a whole can remain sustainable over the long term.

Meanwhile, the pharmaceutical shortage triggered by instability in the supply of generic drugs continues to persist. According to an announcement by the Ministry of Health, Labour and Welfare, as of May 2026, Approx. 13% of all ethical drugs (2,269 items) were subject to limited shipment or supply suspension. In addition, with the rapid shift from long-listed products to generic drugs, there is a significant risk that valuable assets of the domestic pharmaceutical industry, such as manufacturing technologies and know-how accumulated over many years by brand-name drug companies manufacturing long-listed products, may not be properly transferred and could be lost. The Company recognizes this as a major challenge

to the sustainability of Japan's pharmaceutical industry.

Under these business conditions, the Company is working to address industry-wide challenges by building a collaborative framework in which brand-name drug companies, generic drug companies, and pharmaceutical contract manufacturing companies work closely together. Through this collaboration, the Company aims to establish an ecosystem that ensures a sustainable and stable supply of drugs that are therapeutically essential over the long term, thereby realizing a healthy, circular model for society as a whole.

Therefore, the Company will continue to optimize its own manufacturing lines to promote increased production of pharmaceuticals while considering a wide range of collaborations with companies that support our concept of a stable supply ecosystem for off-patent medicinal products, with the aim of "securing manufacturing capacity" and "building a system that allows for mutual backup production." The Company believes that continued investment is necessary for both of these purposes.

The funds raised through the Third-Party Allotment will be used for growth investments, including strengthening the Company's own manufacturing lines and collaborating with companies that share the same management policies and philosophy with the Company.

## (2) Reasons for carrying out the funding through the Third-Party Allotment

In line with the purpose of raising capital through Class Shares—securing a stable financial foundation by strengthening equity capital and achieving medium- to long-term growth by allocating the raised funds to capital investments—the Company believes that it is necessary and appropriate to strengthen our equity capital through equity financing rather than debt financing.

Among equity financing options, issuing common shares would immediately result in a significant dilution of voting rights, potentially harming the shareholder value of existing shareholders. Therefore, the Company believes that issuing Class A preferred shares, which have no voting rights and no conversion rights to common shares, and thus do not currently or in the future dilute the voting rights of common shares, is an appropriate financing option.

Furthermore, given the certain uncertainty surrounding the timing and amount of future funding needs, the Company believes that a phased approach to fundraising will improve capital efficiency and enable flexible and agile fundraising in line with the progress of its business and investments.

In order to secure the necessary funds and stabilize its financial structure while restraining immediate and future dilution of its common shares, the Company has considered it necessary to raise funds from investors who have a deep understanding of its business and strong risk assessment capabilities. In light of these circumstances, and taking into account the characteristics of investors, the scale of fundraising, and economic conditions, the Company have been considering potential underwriters who would be positively interested in a third-party allocation of its preferred shares. After comprehensively considering that they have a thorough understanding of the business environment surrounding our company, our business situation, and its capital policy, the Company have determined that allocating non-voting class shares to DBJ through third-party allotment is the most effective option.

In underwriting these shares, DBJ will utilize the "Supply Chain and Infrastructure Fund (Note 2)," which was established as part of its "Special Investment Operations (Note 1)."

Notes:

1. Established as an intensive but temporary scheme to supply growth capital from the perspective of promoting the competitiveness of Japanese enterprises along with regional revitalization, which draws only a portion of the investment (industrial investment) from the Japanese government - enough to encourage the private sector to supply growth capital.

2. Established as part of Special Investment Operations for the purpose of investing in initiatives aimed at strengthening the supply chain through ensuring a stable supply of critical products and fortifying infrastructure, including logistics, through the use of digital technology.

3. Amount, use, and intended timing of use of funds to be raised

(1) Amount of funds to be raised

1st Series Class A Preferred Shares

(i)	Total amount to be paid	10,000,000,000 yen
(ii)	Estimated issuance costs	127,000,000 yen
(iii)	Estimated net proceeds	9,873,000,000 yen

Note: The main items in the “estimated issuance costs” are commission expenses, registration tax, and valuation fees.

2nd Series Class A Preferred Shares

(i)	Total amount to be paid	Up to 10,000,000,000 yen
(ii)	Estimated issuance costs	Up to 35,000,000 yen
(iii)	Estimated net proceeds	Up to 9,965,000,000 yen

Note: The main item in the “estimated issuance costs” is registration tax.

(2) Specific use and intended timing of use of funds to be raised

Specific use of funds	Amount (millions of yen)	Expected spending period
Growth investment, such as expanding the Company’s own manufacturing lines and collaborating with others	Up to 20,000	From August 2026 to March 2028

\*The funds raised will be managed in a bank account until they are actually disbursed.

As described in "2. Purpose of and reasons for the issuance of Class Shares through the Third-Party Allotment" above, the Company will continue to optimize its own manufacturing lines to promote increased production of pharmaceuticals while aiming to secure manufacturing capacity and building a mutual backup system to ensure a stable supply of off-patent medicinal products. The proceeds from the Third-Party Allotment will be used for the aforementioned capital investments and growth investments.

In raising funds in this manner, it is necessary to secure funds that can be used flexibly according to the scale of the investment. Therefore, with regard to 2nd Series Class A Preferred Shares, the Company will notify DBJ of the desired date and amount of the payment and raise up to 10,000 million yen, which will be used as such funds.

4. The Company’s evaluation of the reasonableness of the use of funds

The Company believes that using the funds raised through the issuance of Class Shares for the purposes described in “3. Amount, use, and intended timing of use of funds to be raised (2) Specific use and intended timing of use of funds to be raised” above will improve profitability through a stable supply of pharmaceuticals and contribute to improving its

future financial structure, as well as contributing to the enhancement of its corporate value. Therefore, the Company has determined that the use of the funds is reasonable.

#### 5. Reasonableness of the issuance terms and conditions

##### (1) Basis for calculation of payment amount and the details thereof

In determining the terms of issuance of Class Shares, in order to ensure fairness, the Company commissioned Plutus Consulting Co., Ltd. (hereinafter, “Plutus Consulting”), an independent third-party organization, to calculate the price of Class Shares and received a valuation report on the fair value of Class Shares, which is calculated by Plutus Consulting using a general pricing model, taking into account certain conditions (preferred dividends from Class Shares, cash-consideration call option, cash-consideration put option, credit spread of the Company, etc.).

##### (2) Basis for the determination that the number of shares to be issued and the scale of dilution are reasonable

The Company will raise up to 20 billion yen by issuing up to 20,000 shares of Class Shares. In light of the purpose of issuing Class Shares and the use of funds described in “2. Purpose of and reasons for the issuance of Class Shares through the Third-Party Allotment” and “3. Amount, use, and intended timing of use of funds to be raised” above, the Company has determined that the issuance volume of Class Shares is reasonable. It should also be noted that, since Class Shares are so-called “bond-type class shares” that do not grant voting rights and do not include any put option whose consideration is the Company’s common shares, there is no possibility of dilution for the Company’s common shareholders.

The Capital Reduction will not cause any change in the amount of the Company's net assets as it is a transfer of amounts between items in the net assets section of its balance sheet.

It should also be noted that the Capital Reduction is conditional upon the payment for the Third-Party Allotment.

Regarding 2nd Series Class A Preferred Shares, after the Company determines and notifies DBJ of the desired payment date and desired payment amount, the Company's Board of Directors plans to determine the specific offering terms within the scope of the content set forth in Attachment 1-2, "Issuance Terms and Conditions of 2nd Series Class A Preferred Shares." below, and we will promptly notify you once these terms are finalized.
